# T34™

## Deliver Syringe Infusion Anywhere

Provide complete small-dose infusion therapy safely and economically wherever your patients receive care.
The T34™ ambulatory syringe pump from CME contains many features of larger syringe pumps in one highly compact, lightweight design.
The T34™ pump is easy to use for inpatient and outpatient applications.

## ⬥ Applications

- Medications/analgesics
- Palliative care
- Brittle Asthma
- Chemotherapy
- General fluid replacement

## ⬥ Intended Use

- Intravenous
- Subcutaneous
- Percutaneous
- Epidural (in close proximity to nerves)
- Intra-operative site
- Intra-arterial

## Features & Benefits

### Automatic Syringe Detection
Automatically detects any syringe brand using 3 independent sensor system. Unique algorithm detects your drugs volume to reduce dosing errors.

### Fully Programmable Infusion
Deliver your preferred continuous or intermittent protocol.

### Programmable Flow Rates
0.1 – 650 ml/h range to meet your every needs.

### Programmable Infusion Time
Instead of rate, you can select from 10 minutes to 100 hours of default infusion time. The T34™ syringe pump then automatically calculates flow rate.

### Configure Group Settings
BodyComm™ software with serial port allows you to customize an infusion protocol and easily program multiple T34™ pumps with the same settings.

### Inpatient/Outpatient Accessories
A lockbox is available for pole-mounted use, and/or a carrying pouch for home care.

### BodyComm™ Software
Review patient history with charts and 1000 events log or manage pump settings on your PC.

### Air & Mobile Medicine
CME infusion pumps provide a complete range of infusion onboard any air or ground vehicle. CME pumps are RTCA-DO160 compliant.

## True Portability

### Size
167 x 66 x 39 mm.
The T34™ syringe pump fits anywhere.

### Weight
277 g
Patients can carry it wherever they go.

### Battery-Powered
Operates using one 9V Alkaline battery. The battery lasts for 7 full devilries.

## Flexible Configuration

### Supports Multiple Languages
Over 20 languages available to meet your needs and preferences.

## Safety & Security

### Full Alarm Protection
Helps prevent events and instill confidence in patients.

### Descriptive Status/Alarm Display
Easy-to-read backlit LCD.

### Easy-Scroll Event Review
Press INFO key for hour-by-hour event log.

### 3-Level Access Codes
Prevent accidental or unauthorized program changes.
